Description [Edit](#)

das lern-profil des users muss auch bei schließen der app gespeichert werden, ohne das geht's nicht ;)

Core data:

- <http://www.cimgf.com/2014/06/08/the-core-data-stack-in-swift/>
- <https://developer.apple.com/library/prerelease/mac/documentation/Swift/Conceptual/BuildingCocoaApps/WritingSwiftClassesWithObjective-CBehavior.html>
- <https://www.youtube.com/watch?v=3IDfgATVqHw>
- <http://www.pumpmybicep.com/2014/07/13/core-data-querying-basics/>
- <http://www.pumpmybicep.com/2014/07/22/implementing-core-data-nsmanagedobject-subclasses-in-swift/>

To Do:

[Hide completed items](#) [Delete...](#)

25%

- ☒ ~~learn that core data stuff in swift~~
- ☐ find a way to ensure that the model itself remains independent of core data. use wrapper classes that can save model classes... dependency injection... DIP!
- ☐ pull general core data stuff into portfolio
- ☐ make user performance data persistent
